

EARTH-SYSTEM DECISION INTELLIGENCE

Operational Weather Intelligence & Earth-System Decision Support

A veteran-owned small business helping federal and technical teams turn weather, climate, geospatial, and AI systems into reliable operational decisions.

35+ YEARS

EARTH-SYSTEM EXPERIENCE

10 YEARS

USAF WEATHER OPERATIONS

NASA GSFC

PROGRAM EXPERIENCE

CCM

ACTIVE SECRET CLEARANCE

CORE CAPABILITIES

Applied Meteorology & Earth Systems

Operational forecasting, aviation weather, model evaluation, satellite and NWP data, and decision-grade environmental analysis.

Geospatial AI & Weather Systems

Hybrid NWP/ML research, GRIB, NetCDF, and Zarr pipelines, geospatial automation, and multi-agent decision-support workflows.

Technical Leadership & Integration

Program and product leadership across research, operations, software delivery, scientific data platforms, and mission workflows.

WHY AETHERIS VISION

- Scientist-led delivery from observation and modeling through software and operational adoption.
- Ten years of USAF weather operations spanning aviation, radar, leadership, and IFOR Bosnia.
- NASA GSFC contractor leadership across scientific programs, data systems, and cross-functional teams.
- U.S.-European experience across government, industry, and research.

SELECTED PRINCIPAL EXPERIENCE

NextGen Federal Systems

Director / Principal — meteorology and AI-enabled weather systems.

SMHI + Findwise (Sweden)

Weather, search, and knowledge systems for public and industrial users.

ADNET Systems / NASA GSFC

Technical and program leadership supporting Earth-science missions.

U.S. Air Force

Operational weather forecaster and leader, 1988–1998.
